

## Release Notes | DHCP Server Upgrade

A recent update to dinManage allows users the ability to view, add, edit, or delete **Domain Names** and **DNS IP**, within the DHCP server, without the assistance of dinCloud support.

In the 'My Security' section in dinManage, customers will be able to click on the network, within which they would like to add, or edit a domain. They will be provided with complete details of the network, along with fields for **Domain Name**, and **DNS IP information**.

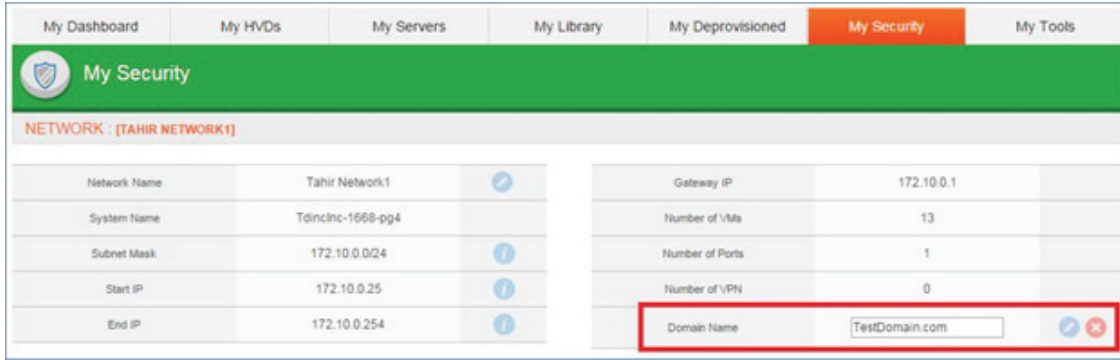

### Click-able Network Names

Private IP (Up to 5 Networks allowed) <span>Add Network</span>		
Network Name	Default Start/End IP	Actions
<a href="#">Test-Network</a>	1.1.0.25/1.1.1.254	<a href="#">i</a> <a href="#">e</a>
Network Name	Subnet	Actions
<a href="#">Test-Network1</a>	10.1.1.0/24	<a href="#">i</a> <a href="#">x</a> <a href="#">v</a>
<a href="#">Tahir Network1</a>	172.10.0.0/24	<a href="#">i</a> <a href="#">x</a> <a href="#">v</a>
<a href="#">Tahir Network</a>	10.1.1.0/25	<a href="#">i</a> <a href="#">x</a> <a href="#">v</a>

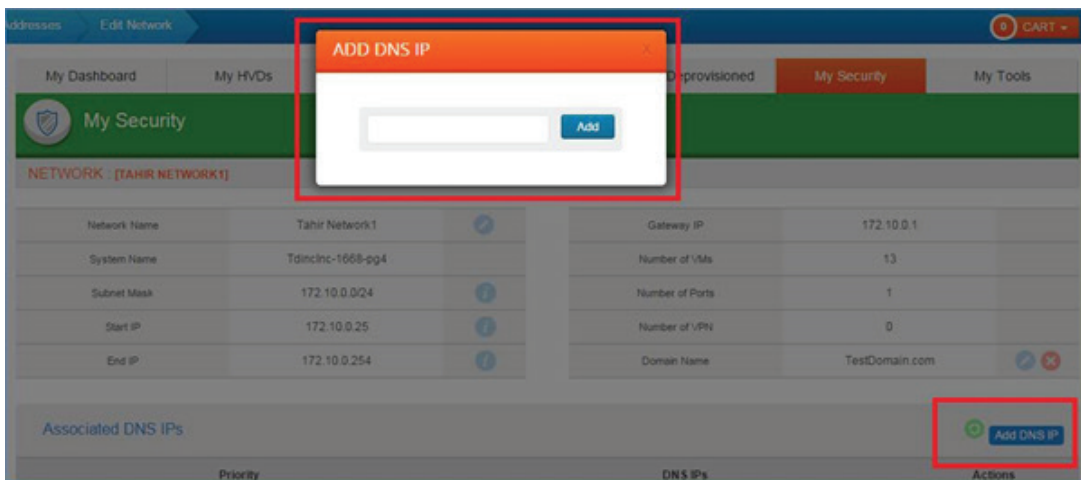

### Edit Network Name

My Dashboard	My HVDs	My Servers	My Library	My Deprovisioned	My Security	My Tools
<b>My Security</b>						
NETWORK : [TESTING]						
Network Name	<input type="text" value="Test-Network"/>	<a href="#">e</a>				
System Name	TdincInc-1668-pg3					
Subnet Mask	1.1.1.1/23	<a href="#">i</a>				
Start IP	1.1.0.25	<a href="#">i</a>				
End IP	1.1.1.254	<a href="#">i</a>				
Gateway IP	1.1.0.1					
Number of VMs	30
